CDN WITH A
UNIQUE PROMISE -
KEY EVENTS
GUARANTEE

USE ANY CDN –
INCLUDING YOUR OWN
STREAMING CAPACITIES
AND GLOBAL CDN'S

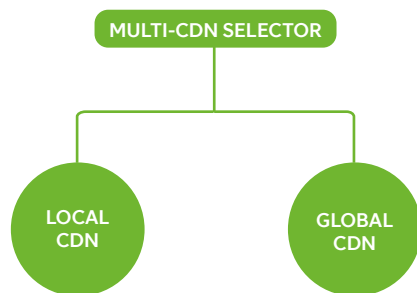

ALWAYS GET THE BEST
PRICES AVAILABLE –
NO EXTRA COST
FOR SELECTOR

FLEXIBLE DEPLOYMENT OPTIONS

Whether you are looking to harness the power of CDN for the first time - or want to super-charge your established CDN setup – we offer flexible deployments to match your needs.

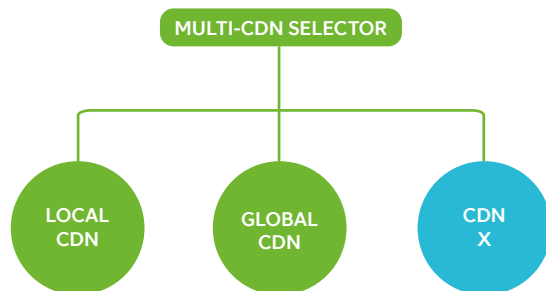

STANDALONE

Everything you need to run a Multi-CDN. Combine the power of our Nordic & Baltic and Global CDNs with our CDN selector to deliver the best experience.

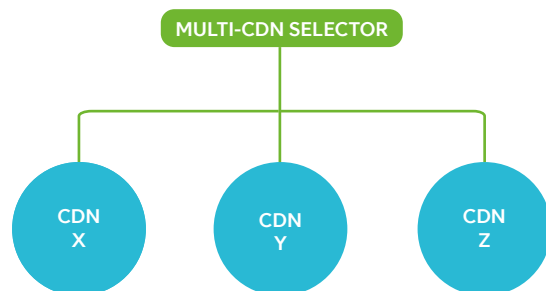

ADD-ON

Supercharge your existing CDN setup by adding our CDNs to your existing setup and optimizing them all with our CDN Selector.

SELECTOR ONLY

Get more out of your existing CDN setup by using the CDN+ selector to optimize performance and cost-effectiveness.

USE JUST MULTI-CDN SELECTOR

Use just our Selector and continue to deliver from your own CDNs. Select the CDN based on delivery quality and a wide range of other business rules. You only pay for the traffic used by our Selector i.e. video manifest files and “heartbeat” video segments used to measure quality.

Our CDN Selector dynamically selects the best CDN to deliver video from to achieve the best quality, lowest cost and best uptime. Using latest server-side technology hosted in our network, our service enables you to combine CDNs without any client updates, SDKs, server-side coding, or changes to your workflows.

MULTI-CDN WITHOUT ADDED COSTS

In order to measure quality and control CDN selection our Selector service delivers certain elements of the streams that would normally be delivered by the CDNs themselves (customized manifests and heartbeat segments). As you would normally pay the CDNs for this traffic, adding our Selector will simply transfer this cost to us rather than add any new cost.

Tet is one of the largest technology companies in the Baltics that develops innovations and offers quality TV, internet, electricity, and e-commerce services for private persons as well as IT&T service solutions to businesses in Latvia and export markets. The company produces own TV content and develops OTT services, cloud media services such as online video platform, multi-CDN, transcoding and cloud TV playout as well as offers high technology solutions like cloud computing and IT security.
